

3/4/10

I am forwarding the following information about the Creative Design CAD Camp. What a great opportunity. Please distribute broadly. - Anita

Creative Design CAD Camp - Greater Bangor Students in Grades 9-12

Dear Friends of STEM Education:

I am pleased to announce Creative Design at CAD Camp. Registration is \$775 for resident campers and \$550 for commuter campers. Scholarships are available for girls, minorities, and underprivileged campers. Please forward the information below to individuals and organizations that might be interested, whether paying full the registration fee or seeking scholarship assistance.

Thank you,
Karen Horton, University of Maine
2010 Creative Design at CAD Camp

June 27 – July 2, 2010 for Campers Entering Grades 9-12

Web site: www.umaine.edu/met/cadcamp/

At the University of Maine Creative Design at CAD Camp you'll have fun while you design your own wall hanging using computer-aided design software! We know you'll really like the other kids who attend. You'll get to know your new camp friends on the ropes courses, on the climbing wall, canoeing, and just hanging out. In the computer-aided design sessions you'll experience some of the latest professional 3D modeling software. The computer classroom is air-conditioned with up-to-date computers and "comfy chairs." You'll get lots of individual help from our team of CAD faculty professionals and returning campers. You'll leave with new computer skills and career training - and you'll have so much fun along the way you'll want to learn more!

Scholarship applications can be downloaded from the web site. Here's what 2009 campers wrote to our sponsors including the Maine Department of Transportation, Bentley Systems, and the College of Engineering:

In the beginning I didn't really sign myself up for this camp, my mom did. I'm so glad that she did. I had a great time. Meeting all these new people, and designing things I never thought I would be able to do. The whole CAD program was really interesting and fun. But I have to admit that my favorite thing was the Maine Bound part. I like the outdoors and all the new things I got to try like: the zip line, the ropes course, rock climbing, and all the other group activities. This was an amazing experience. And I really want to come back next year.

*Sincerely,
Katherine*

I hope you continue to fund this program, for this training is the first step to many careers. I love the physical activities and the CAD training including the instructors and assistants. The dorms are good and the food too.

*Sincerely,
Robert*
